

# For a Healthier NY 19: The Choice is Clear

ANTONIO DELGADO will fight for affordable access to medical and mental health care for everyone by strengthening — not killing or weakening — the Affordable Care Act.

He supports a public option to buy into Medicare. He supports negotiating with pharmaceutical companies for more affordable drugs. He supports protecting women's health. He supports enacting programs

for prevention and treatment of opioid and other addictions. He supports responsible gun polices without NRA influence. And he supports farm and nutrition bills that assure affordable access to healthy foods and support our local farmers.

For these reasons, we the undersigned health professionals and others in our communities support Antonio Delgado for Congress.

## Vote Antonio Delgado for Congress on Nov. 6.

**Better still, join our efforts for better health for all.  
Tell your friends what's at stake and make sure they vote.**
